

MODEL MTOV 8040

Proper to contemporarily cut both in horizontal sense that vertical with a speed of cut from 0 ÷ 25 m/min. Slide on binary type T70 / U 80 / Total power Kw 52 Depth of Vertical max420mm. Depth of Horizontal cut max250mm Vertical disk f11500mm. Recommended generator KVA125

ELECTRIC MOTORS

- Vertical cut kw 30
- Type IP 55 Class F η 0, 87÷ 0,92V 380 50 Hz B3 \bullet Horizontal cut Kw18,5
- Type IP 55 Class F ŋ 0, 87÷ 0,92V 38050 Hz B3 • Advancement Kw2
- Type IP 55 Class F η 0, 80÷ 0,92V 380 50 Hz B5 \bullet I install hydraulic Kw 1,5
 - Type IP 55 Class F ŋ 0, 80÷ 0,92V 380 50 Hz B5

ELECTRIC PICTURE

With commands of driving to low tension as foreseen by the law Opportunely proportionate and pulsating of march / single arrest for every motor.

SAFETY

The machine is provided of electric devices of block that make her/it sure and of acoustic and bright device that warns that the cars it is in movement. And' provided of protections on all the mechanical organs in movement and protection on the disks up to maximally possible.

I INSTALL HYDRAULIC

Pomp to gears. distributor to3 elements Brought 10 litri/1' Pressure 100 ÷ 150 bar Ability reservoir 50Lt.

ADVANCEMENT OF CUT

Hydraulic to varying course independent operated through lever inversion of march with point of madman speed max. 50m/min. 4 to empty 4 wheels engines

SINCE 1968

LOOM

It structures in steel on purpose studied for a' tall resistance, elettrosaldato. Articulation vertical cut, to hydraulic command through hydraulic martinetto to double effect; Translation cart for Horizontal loom through martinetto to double effect And it flows on pads and adjustable guides to annul the game of usury. Driving Horizontal cut through hydraulic martinetto to double effect integrated in a system of levers.

MEASURE AND MASS

Width	2000	mm. ~
Lenght_	2600	mm. ~
Height	1800	mm. ~
Weigth_	2500	Kg
weigtn_	2500	r.g.
